SUBMISSION OF DRAWING CHANGES

Sir:

Enclosed are drawings corrected in a manner suggested by the examiner. Please bear in mind that the slide rail 7 can be mounted to the frame member either by fitting into the groove, or have the screws for the slide rail that are received within the groove frame number 3, and are held in place by means of nuts. Thus, the slide rail, either way, is partially secured within the frame member 3.

It is believed that Figs 7 and 7a have been corrected so as to show a part of the slide rail itself may fit within the groove, although the screws and nuts may likewise be used, as described on page 12 of the specification.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'P. Denk', written over the typed name.
